

i just wanted to say that the people including me who pay for this service (xm radio) enjoy every thing about it including traffic updates and weather.so my recomendation to the people who dont like this service and the others that xm radio provides then simply dont pay for the service.for the truck drivers including me the traffic and weather updates provided by xm radio help keep the roads safer for obvious reasons.so if you take these services away i feel that your showing that safty is not that important.think about what your taking away when those of us whos listening to xm no longer no that just up around the corner is snow ice and traffic pileup whould you send your family in to that blinded.....thank you for taking the time to read this.
